WELCOME to our second ROBINSON, VICTOR-McCAWLEY (RVM) fixed price list.

Welcome to our second RVM pricelist. We really appreciate the response to our first list and especially the kind comments and words of encouragement. We're still building, but we don't think you will be disappointed with this latest offering. Included is an excellent group of Connecticut Cents by die variety, our usual wide selection of middle dates plus an outstanding group of late dates highlighted by an almost complete run of 1849s by die variety! Some of you commented about difficulty reading the type in our last list. We have endeavored to improve that. Please give us your feedback. We are here to serve YOU and we are always trying to improve. Our next list will be issued after the first of the year. December will be devoted to preparing for our next all Copper auction. We hope to have the catalog in your hands by December 21st. We will be attending the NOISE show in Chicago Dec 7-9 as well as the FUN show in Tampa, Fla Jan. 2-5. We hope you will stop by to say hello if you are attending either of these shows.

WE OFFER THE FOLLOWING TERMS OF SALE

1. All Coins GUARANTEED Genuine - This is a LIFETIME Guarantee!
2. All attributions are guaranteed correct - also LIFETIME Guarantee!
3. The IDENTIFIED POPULATION estimates (RARITY) of varieties change as more pieces of Copper are attributed, and it is IMPOSSIBLE to have an ACCURATE rating! But, we do use the most up-to-date data available - as reflected in "Copper Quotes by Robinson". (CQR)
4. STRICT ANA & EAC guidelines are used in grading, which consist of assigning a grade based on the state of preservation/wear of the piece. We then describe the condition of the coin so that you will have as good an idea as possible of what the coin looks like without actually being able to see it in person. It is our intent that there be NO SURPRISES when you receive the coin. Virtually all old Copper has accumulated some marks in their lifetime since leaving the Die/Mint - It is our intent to describe any such marks of significance. We now introduce a new term - VALUE GRADING!!

Sharpness Grade is far easier to describe in consistent terms, and where there may be circulation defects such as porosity, gouges, rim dings/nicks/bruises, corrosion and other such detractors, arriving at a NET GRADE is certainly subjective at best. The grade that we have assigned on the first line describing each coin is intended to represent this NET GRADE/VALUE GRADE.

If the Second Line does NOT start with a Sharpness grade, then it is our opinion that the NET GRADE of the coin is the SAME AS the SHARPNESS GRADE of the coin, and that there are NO SIGNIFICANT defects worth mentioning. Perhaps NOT PERFECTION, but whatever marks or other elements that may be present, do not deduct from the over-all appearance/grade of the coin, and are mentioned for accuracy.

5. A Full 30 DAY return privilege is allowed for any or no reason. Our business is based upon attracting repeat customers, and it does none of us any good for you to keep a coin with which you are not completely satisfied. The 30 day period is an approval period, and we welcome any of our customers to show their purchases from us to any other EXPERIENCED EAC member for another opinion. Sales are final after the 30 day period, but we will certainly consider extensions in this time limit upon any reasonable request.
6. All coins are guaranteed to meet ANACS certification for grading! Any coin graded lower by ANACS can be returned within 120 days for immediate refund of the full purchase price plus all ANACS certification service fees.
7. All orders are sent postpaid.
8. Approval service is available to established clients with 7 day terms.

We are always interested in buying Early Copper & Type Coins! If you have coins to sell, we would be happy to have you contact us. We are willing to PAY STRONG PRICES for NICE coins. We will also accept coins on a consignment basis at a reasonable commission. Please feel free to contact either of us with ANY questions that you may have:

Some of you may have seen the following description in a recent ad in Coin World:

"1886-P Silver dollar MS65/65
A RARE DATE in RARE condition!"

The ad caught my attention! I have seen many coins described as Scarce! Rare! Extremely Rare! But I believe this is the first time I have seen an 1886 Dollar so described. In fact, upon reading it I felt as if some boundary had been crossed. If an 1886 Silver Dollar can be described as rare, just what does the term mean anyway!

Let's examine the real rarity of the 1886 dollar. In the process maybe we can shed a bit of light on what "rarity" means. Before proceeding I should point out that there are at least two types of rarity. The first may be described as "absolute rarity". Absolute rarity refers to the total population of an item. For instance we presently know of six examples of the 1894-S Barber Dime. It is a RARE coin! There just aren't many around of any sort!

A second category of rarity is condition rarity. There are presently less than a half dozen examples of 1803 Sheldon 265 known in strict EF40. Thus S-265 can be properly described as RARE in Extra Fine or better even though it is only moderately scarce in lower grades.

Returning to the 1886 Silver Dollar. We note that it flunks both tests. The total population of 1886 dollars is probably in the neighborhood of 25% of its original mintage of 19,963,886 approximately four and one half million coins. Now of course not all of these coins are mint state. Perhaps as few as 250,000 remain in uncirculated condition. Of the quarter of a million mint state coins most experts agree no more than 10,000 pieces survive in MS67 grade, perhaps as few as 5,000 pieces. In any case, even in the highest condition a population of 5,000 coins is hardly a rarity.

What has happened when coins like an 1886 Silver Dollar are described as rare? In all fairness it is possible that in the experience of the advertiser of the above coin, an MS65 1886 is rare! He may have owned only one or two. Of course a dealer who has been active in the market for many years will have seen hundreds of examples. But it is possible a coin may appear rare due to current availability.

The lack of availability of a coin may cause it to appear rare. Even in a case where a great many coins overhang the market. In the case of the currently promoted MS65 Dollar market there are literally hundreds of thousands of coins held by speculators and investors ready to be dumped into the market when the price reaches a high enough level. The availability is determined by greed not true demand.

On the other hand many collector coins seem rare because they are essentially unavailable. An example would be a nice Fine 12 1797 Large Cent. We know that this is not a rare coin. It is, in fact, decidedly common. We know there are literally thousands of examples extant. However, so many are in permanent collections it has become a difficult date to find in nice condition. A nice Fine 1797 is a very respectable coin. A coin other collectors want to own. This "true demand" is the basis for its "apparent" rarity. As the collector base increases the availability of 1797 Large Cents in Fine decreases. Eventually higher prices must be paid to acquire the few coins available. The coin has not become any rarer but it has become more desirable! More people would like to own one. This is what motivates the Copper market, love of the Old Coppers and a desire to have a few around.

As for 1886 Dollars, are they rare? Well, I can only say they're rare in our lists.....and likely to remain so! However, if you happen to run into one of those dirty old 1797 Large Cents I think I know a home for it.
